

LIGHTING FOR DIGITAL IMAGING AND FILM

BRING THE LIGHT TO FILM AND TV PRODUCTIONS

As a lighting technician, your job is providing illumination to ensure the look and feel of images—both in a studio or on location—matches the vision of the camera crew, designers and director.

GAIN MENTORSHIP FROM INDUSTRY PROS

Our faculty are experienced professionals who offer hands-on training in the tools, techniques and procedures for lighting professionals.

This includes learning about the different types of equipment and setting it up to ensure industry safety standards. The training encompasses learning to work comfortably at studio heights to rig lighting and gain expertise with new digital imaging systems.

BE ON SET SOONER

By the end of this four-week intensive training course, you'll have the skills to get started in your new career working in B.C.'s film and television production industries quicker.
