

# ASSOCIATE OF SCIENCE DEGREE

# BUILD A FOUNDATION IN SCIENCE

From biology and chemistry to physics and mathematics, the sciences are the root of a strong post-secondary education. The Associate of Science degree program at Capilano University offers the flexible training you need to lay the foundation for your career.

## GAIN A BREADTH OF KNOWLEDGE

In this two-year, 60-credit associate degree, you'll take a wide range of science courses, improving your skills with laboratory equipment, conducting experiments, writing essays and creating lab reports. You'll also get an introduction to the arts, taking up to 18 credits in English and arts electives.

In our applied program, you'll get to test your new skills prior to graduation during a work practicum with a local business.

## APPLY YOUR CREDITS TO A BACHELOR'S DEGREE

After you complete your associate degree, you can seamlessly transfer the 60 credits earned at CapU to a bachelor's degree at another post-secondary institution in B.C.

## AREAS OF STUDY
