

Bachelor of Arts–Applied Behaviour Analysis (Autism)

Study in the only ABA Bachelor's Degree in Western Canada

Applied behaviour analysis is the most scientifically proven treatment for children diagnosed with autism spectrum disorder. With the Bachelor of Arts Degree in Applied Behaviour Analysis (Autism) at CapU, you'll gain the skills to become a Board-Certified Assistant Behaviour Analyst (BCaBA).

Customize your training with electives

In the first two years of the program, you can take up to 30 credits of electives, with courses available in child and youth development, early childhood education, behavioural sciences, social work and working with children with special needs or developmental disabilities.

Get experience with practicum placements

During the program, you'll participate in three supervised practicum placements in various settings to help ease the transition into your new career after graduation.

Career paths

- ABA Consultant
- ABA Therapist
- Board-Certified Behaviour Analyst
