

Bachelor of Science

Gain the skills to make a difference, study science at Capilano University

Build the foundation for your career in science, technology, engineering and mathematics (STEM) within the Bachelor of Science degree program at CapU.

Learn in the lab and the field

Working in small classes under the guidance and mentorship of our expert faculty, you'll gain the skills needed for current science careers through hands-on lab and field work. You'll also get to collaborate with local partner organizations, developing real solutions to problems impacting our region.

Specialize to stand out

In addition to core courses in biology, chemistry, physics, computing science, mathematics and statistics, you'll choose one of three career specializations: biomedical sciences, computational sciences, or environmental sciences.

Career paths

- Biologist
- Computer programmer
- Data scientist
- Dentist
- Doctor
- Ecologist
- Environmental consultant
- K-12 science teacher
- Pharmacist
- Research scientist

Program
